## 2 Background

### Abstract

Video games are also called video games, electronic games is the user (player) and video equipment interaction. Traditional video games are generally referred to as raster display devices. However, with the development of video games, now video games have been defined for all types of display devices.

Refers to all the interactive games that run on the electronic media platform. Electronic games carrier is divided according to the game can be divided into arcade games, handheld games, video games (or console games, video games and is part of the region, said the video game), computer games and mobile games (also called mobile games), games where people through electronic equipment such as computers, game consoles and mobile phones. Western games tend to video games and video games are divided into video games and audio games, and the Chinese game industry is accustomed to all the electronic game refers to the

### 1 Introduction

The electronic system used to run the game is often called a gaming platform. PSP Sony, Nintendo, DS Nintendo, Wii, and Xbox, which are commonly used in our computer and other games. These include large host computer game platform, small handheld game consoles and arcade game platform is one of the special.

An input device used to operate a video game is called a game controller (a handle, a keyboard, etc.). Input devices used to process video games are called game controllers, and across platforms are not the same. A dedicated host controller can contain only one button and a joystick. Of course there may be more functional buttons and or more joystick. Early PC games often require a game keyboard. And many computer games even require the player to use the keyboard and mouse to operate at the same time.

Electronic games available in 1952, for the well word chess game, the game platform is a vacuum tube computer, then the modern computer is just available for less than ten years. After the emergence of the release in 1958 of the tennis game "Tennis" (For Two), although the game is said to be a tennis game, in fact, the picture is similar to the modern air cushion.

### 3 Classification
